

The AI operating system for **real estate capital.**

Structured intelligence and agentic execution for institutional real estate investment firms.

DATA

AI AGENTS

WORKFLOWS

PROBLEM

Real estate runs on **fragmented workflows.**

Excel models, PDF leases, broker emails, and tribal knowledge scattered across teams. The result: slow underwriting, weak institutional memory, and no portfolio-level visibility.

94%

of spreadsheets contain errors – the system of record across the industry

\$11T

in real estate assets still managed primarily in spreadsheets

1 – 4

weeks to underwrite a single deal end-to-end

80/20

analyst time gathering data vs. analyzing it

The industry is data-rich and **intelligence-poor.**

MARKET

A \$13T asset class **running on Excel.**

Real estate is the largest asset class without a modern operating system.

T A M

\$13T · Global institutional real estate AUM

S A M

\$25B · Real estate software + analytics spend (annual)

S O M

\$2.5B · Top-200 firms, \$1B+ AUM

WHERE THE MONEY SITS

13 trillion in real estate AUM held by institutional investors — pensions, REITs, PE funds, family offices.

WHAT THEY SPEND

Annual software + analytics budgets. Yardi, MRI, Argus, BI tools — RIA replaces fragmentation across the stack.

WHO WE WIN FIRST

200 institutional firms with \$1B+ AUM, 50+ assets, and active dealflow — average ACV \$300K–\$1M.

Win the institutional wedge. **Expand to the full \$25B layer.**

W H Y N O W

Intelligence is commoditizing. **Workflow context is the moat.**

LLMs alone can't run institutional real estate. The winners will own the structured data, integrations, and execution layer underneath them.

The Harvey logo is written in a red, serif font.

Harvey AI

General LLMs + structured legal corpus. Now the default for top-tier law firms.

The Palantir logo features a red circular icon with a stylized 'P' followed by the word 'Palantir' in a red, sans-serif font.

Palantir

Entity ontology over enterprise data.
The infrastructure layer for serious analysis at scale.

The Cursor logo consists of a red 3D cube icon followed by the word 'CURSOR' in a red, sans-serif font.

Cursor AI

Structured codebase context. Turns general AI into reliable software engineering output.

Every vertical needs its operating system. Real estate is the largest one still unbuilt.

S O L U T I O N

One platform. Three layers. All RIA.

L A Y E R 0 3

Products

What firms use.

Dashboards

Deterministic analytics, reports, and KPIs.

AI Agents

Sync chat + async background agents.

Agentic Workflows

Deterministic logic + LLM outputs.

L A Y E R 0 2

Knowledge

Canonical context the AI reasons over.

Structured

Rent rolls, T-12s, models, GL.

Unstructured

Leases, loan docs, emails.

Temporal KB

AI-curated, time-aware facts.

Temporal Graph

Entities, relationships, time.

L A Y E R 0 1

Data

Ingest from every system of record.

Yardi

Excel

Outlook

PDFs

Loan Docs

Market Feeds

Data: ingest everything, **normalize once.**

Connectors and parsers feeding a canonical schema. No more spreadsheet round-trips.

ILLUSTRATIVE

60+ source systems supported

20M+ rows ingested per fund

<5 min from upload to queryable

100% lineage back to source

Knowledge: the **temporal knowledge graph** is the moat.

Three knowledge feeds. One graph that links every entity, document, and event across time.

The graph deepens with every document, deal, and quarter. **That is the compounding asset.**

Applications: three ways **firms get work done.**

Composable surface area. Buy the modules you need. Compose new workflows from primitives.

CLASSIC SOFTWARE

Dashboards

Deterministic, real-time.

- Portfolio overview, asset performance, variance
- Pipeline funnel, deal status, IC tracker
- Covenant + KPI monitoring with thresholds
- Custom views by role (PM, AM, Ops, IR)

AI AGENTS

Sync + Async

Chat now. Run in the background.

- Sync: chat with any asset, deal, or document
- Sync: "Watch for refi triggers across the portfolio"
- Multi-step reasoning over the knowledge graph
- Memory + grounding: every answer cited

AGENTIC WORKFLOWS

Composable

Deterministic glue + LLM judgment.

- IC memo: data pull → draft → review → ship
- Quarterly LP letters with auto-fact-checking
- New deal screen: parse OM → underwrite → memo
- Trigger-based: anomaly → diagnose → notify owner

BEHAVIOR Always-on. Same query → same answer.

BEHAVIOR Conversational + autonomous.

BEHAVIOR Structured pipelines with AI checkpoints.

I N P R A C T I C E

The same platform, **end to end.**

RIA spans every stage of the investment lifecycle on a single context-aware platform.

0 1

Source

Screen OMs and broker packages against the firm's strategy in minutes.

0 2

Underwrite

Parse leases, rent rolls, and loan docs. Auto-build models with full attribution.

0 3

Manage

Monitor budgets, covenants, and operating trends across the portfolio.

0 4

Report

Generate IC memos, LP letters, and investor narratives from structured data.

V A L U E V S T H E A N A L O G S T A C K

S O U R C E

10x

more deals screened per week

U N D E R W R I T E

80%

less time from teaser to model-ready

M A N A G E

60d+

earlier breach detection on covenants

R E P O R T

5x

more frequent LP updates at lower cost

The value, quantified.

What each workflow looks like **today** · and what it looks like on **RIA**.

01 · ACQUISITIONS

Deal screening

30 hrs → 5 min

TODAY

Analysts triage broker emails
by hand

WITH RIA

**100+ OMs auto-scored. Top 5
ranked.**

Underwriting

weeks → hours

TODAY

Manual rent roll + lease entry

WITH RIA

**Model-ready data. Full audit
trail.**

02 · ASSET MANAGEMENT

Quarterly valuations

week → hours

TODAY

30+ min × N properties,
manually

WITH RIA

**ARGUS + attribution drafted in
hours**

Lease abstraction

\$200+ → <\$5

TODAY

Outsourced, slow, error-
prone

WITH RIA

Parsed in seconds. Queryable.

03 · OPERATIONS

Reporting

2 wks → 1 day

TODAY

Copy-paste across 50+ LPs /
quarter

WITH RIA

Per-investor packages in a day

Portfolio Q&A

days → minutes

TODAY

Days of analyst work per
question

WITH RIA

Cited answers in minutes

Reporting at scale, collapsed to an hour.

THE MANUAL CHAIN · PER PROPERTY

SCALING MATH: 20 PROPERTIES / QTR

	MANUAL	WITH RIA	DELTA
TIME	300 hrs / qtr	1 hr / qtr	300× faster
PEOPLE	2–3 FT employees	0 dedicated	2–3 FTEs back
COST	~\$400K / yr	<\$50K / yr	~\$350K saved

NET VALUE · ANNUAL

2–3 FTEs

redeployed to higher-value work

~\$350K

operating leverage captured / yr

WITH RIA · 1 AGENTIC WORKFLOW

TOTAL · ~1 HR / ALL PROPERTIES

Builders and operators **who have lived the problem.**

CEO & CO-FOUNDER

Mohammed Perves

New York, NY

RIA comes from direct founder-market fit. I built the AI & Platforms function from zero at a New York-based real estate private equity firm, working across sourcing, underwriting, asset management, operations, and reporting — the exact workflows RIA is built to modernize.

Previously, I was at Accenture focused on AI/Tech strategy, technology transformation, and product management for Fortune 500 financial services clients, building the enterprise product and data background needed to execute.

*BBA Finance · BS Computer Science
Wilfrid Laurier University, Waterloo Canada*

CTO & CO-FOUNDER

Maja Milinkovic

New York, NY

Direct technical founder-market fit. ML engineer at Reddit with production experience in LLM infrastructure, recommendation systems, and AI extraction — the foundation RIA needs to turn messy real estate data into reliable software.

Previously Senior ML Platform Engineer at a stealth LLM startup, and Software Engineer roles at Nomad Health and Accenture building LLM-powered extraction and recommendation systems.

*BS Computer Science and Biology
McGill University, Montreal Canada*

HEAD OF GTM

Searching...

Actively looking for a GTM leader with real-estate or fintech experience.

THE ASK

Raising \$5M to ship RIA v1.

18 months of runway to reach \$1M ARR and Series A.

USE OF FUNDS

18-MONTH ROADMAP

NOW

Design partners signed

3 firms committed, v0 in pilot

+6 MO

RIA v1 in production

Canonical schema live, 6 use cases

+12 MO

\$1M ARR

5 paying customers, repeatable GTM

+18 MO

Series A

\$2-3M ARR, 15+ firms

Thank you.
